

BRAIN-CONN 2018

The department of IS& IR, conducted a **Workshop on Brain Connectivity and One day conference on Brain-Computer Interface** on **28th, 29th, and 30th of December 2018**. The current program was organized with a vision to equip the neuroscientists in India with hands-on experience in **brain connectivity** analysis by mastering **CONN Toolbox** and also the program opened new avenues to more sophisticated BCI technique. The major highlight of the program was the association of prominent international subject experts as key resource persons who are expertized in **fMRI, and EEG** research like **Dr. Sheeba Arnold Anteraper**, who is working with developers of CONN and is the Senior Programmer at the McGovern Institute, and an expert supervisor in the premier training workshops organised by MartinosCenter for Biomedical Imaging, USA. The renowned BCI experts like a) **Dr Ranganatha Sitaram**, Associate Professor and Director of Brain Machine Interfaces and Neuromodulation Laboratory, Pontifical Catholic University of Chile, b) **Dr. Vinod A Prasad**, Professor and Dean - Industry Collaboration and Sponsored Research, IIT Palakkad handled sessions for the conference.

The programme received a pan India participation and the feedback for the program was encouraging.
